

School child isolation guide for parents and guardians

Symptoms include:

- High temperature - 37.8°C or above
- A new, continuous cough
- Loss or change to your sense of smell or taste

If your child has been in close contact with someone with COVID-19 symptoms and that person **does not live with you or attend the same school as your child, your child does not need to self-isolate**. If your child develops COVID-19 symptoms please follow the chart above.

Please note that if you have been isolating, you, or anyone in your household, cannot take your child to school until you have completed the full 14 day isolation period.
